The image shows a screenshot of a software window titled "Juice Wizard". On the left side of the window is a vertical panel with the text "Beta" and "JUICE SOFTWARE" above a dark, textured image. The main area of the window is titled "Define Web CSV Properties". It contains the following elements:

- A text label: "Type or paste in the URL of the Web page you want to use."
- A text input field labeled "URL" containing the text "http://test.com".
- Two radio button options: "Place as Text Box" (unselected) and "Place as Inline Text" (selected).
- A text label: "Do you want to show live data?"
- Two radio button options: "Yes. Automatically update table" (selected) and "No. Suspend live data updates" (unselected).
- Three radio button options for data format: "Characters" (unselected), "Words" (unselected), and "Lines of Text" (unselected).
- A text label "Maximum:" followed by a small numeric input field containing the value "1".
- A row of five buttons at the bottom: "Help", "Cancel", "< Back", "Next >", and "Finish".

Define Information Source Properties

Do you want to return the same data from this information source?

☐ Yes. Always return the same data.

☒ No. I want to parameterize this information source so users can return instance-specific information.

Replace all the variables of the URL with sequential numbers enclosed in braces. For example, {1}.

`http://test.com?in1={1},in2={2},in3={3},in4={4}`

Double-click each row to specify a name and default value for the parameter, or leave the default value blank.

Parameter Number	Parameter Name	Default Value
1	Param1	
2	Param2	
3	Param3	
4	Param4
